## YOUNG MEN TO COMMAND

Will Have Charge of War Ships Going to the Pacific.

President Anxious to Get Results for Money Which Will Be Expended.

Six captains now in command of vessels of the battle fleet and two commanders of armored cruisers to go to the Pacific have already been slated for detachment and assignment to shore duty, while younger men will be given their places.

Whether there will be others is a matter yet to be determined by the department. Some time ago, after the President had consulted with Rear Admiral Brownson, chief of the bureau of navigation, and Rear Admiral Evans, commanding the Atlantic fleet, the policy was announced of assigning comparatively young men to command the big ships on their 14,000-mile voyage to San Francisco. The reason for the adoption of this policy is not a reflection upon the men who are now in command, but the desire of the department to have the experience which it is calculated will be gained by the trip remain as long as possible in the navy and not be carried by officers to the retired list as they leave the active service.

Because of this, officers will be selected for these important commands who, for the most part, have four or more years to remain on the active list, and who will not be eligible to become flag officers for at least a year or ten months.

According to the announcement made yesterday, those selected for detachment are Capt. W. W. Kimball, of the New Jersey; Capt. Samuel P. Conly, of the Alabama; Capt. Gottfried Blockinger, of the Illinois; Capt. Herbert Winslow, of the Kearsarge; Capt. Edward B. Barry, of the Kentucky; Capt. Lewis C. Helmer, of the Ohio, and Capt. Albert G. Berry, of the armored cruiser Tennessee. Capt. Theodore Porter, of the armored cruiser Washington, already has been detached from that command and assigned to the Naval Home, at Philadelphia. The Washington and the Tennessee are to go to the Pacific to join the South Dakota and California and form another armored cruiser division attached to the Asiatic fleet.

While the selections to fill the places from which these captains have been detached have not been fully determined, it is known that Capt. W. H. H. Southernland, at present a member of the board on inspection and survey, will be assigned to command the New Jersey; Capt. Charles W. Bartlett, assistant chief of the bureau of ordnance, will get the Ohio; Capt. Austin M. Knight, now president of the ordnance board, will have the command of the Washington, and Capt. Thomas B. Howard, recently in command of the Olympia, will be assigned to command the Tennessee.

## MEDAL FOR THEIR CHIEF.

District Firemen Arranging Testimonial for International President.

Immediately before the close of the thirty-fifth annual session of the International Convention of Fire Engineers, which will be held in this city from October 8 to 11, the officers and members of the District of Columbia fire department will present to George M. Kellogg, the retiring president, a gold medal. The District fire fighters have adopted this method of showing their appreciation of the services of President Kellogg, and believe that in presenting the badge they will establish a precedent which will be followed in other cities in which the association may convene.

The badge will bear the following inscription: "George M. Kellogg, ex-president, International Association of Fire Engineers, 1907. Presented to Chief Engineer George M. Kellogg by William T. Belt, chief engineer, Washington, D. C., and his force of fire fighters, October, 1907."

## FORMER POLICEMAN DROWNED

Dominic Connelly Loses Life Near Colonial Beach.

Relatives Will Go to Aid in Search for Body, Which, as Yet, Is Unrecovered.

Dominic Connelly, formerly a member of the police force, who had been employed as an engineer at the Lemon Building, was accidentally drowned in the Potomac River yesterday morning near Colonial Beach, Va.

A week ago Connelly, accompanied by his wife and daughter, went to the resort, where he had intended to spend his vacation.

The news of the death was received yesterday by his brother, William Connelly, of 1206 Sixth street southwest, by telegraph, and as yet no definite details have been learned, although it is understood that the man lost his life while out in a boat.

According to the latest information received by his relatives in this city from the beach, the body has not yet been recovered.

Connelly, who was in his sixty-third year, was a native of Maryland. When but a young boy he enlisted in one of the regiments of the State, and as a private he engaged in the hostilities of 1899-05. In 1899 he was appointed a member of the police force. Because of his alleged fall, he was dismissed from the force in connection with his duties he was dismissed from the force in 1899 by Commissioner Roberts. During Connelly's service as a policeman he was stationed at the Second precinct a greater portion of the time.

Following his dismissal from the force, Connelly went to work in the Signal Corps branch of the War Department, and since then had been employed at the Lemon Building.

It is probable that members of his brother's family will go to Colonial Beach to-day to aid in the search for and care of the body.

## NOVEL FREE EXHIBITION.

"Pygmalion and Galatea" in Marble and Life at Kamm's Store.

S. Kamm, Sons & Co. are advertising a novel entertainment for the patrons of their store this week, beginning to-morrow. It is termed "Pygmalion and the Statue Galatea," and is a beautiful portrayal of this fascinating old Greek myth. Everybody knows the story of Pygmalion, the sculptor who created, a statue of a beautiful woman, fell in love with his handiwork, and prayed to the gods to endow it with life. The Festival of Venus was at hand, and because of his prayers and sacrifices, the gods granted the petition of Pygmalion.

This marvelous illusion shows this wonderful transition from marble to the radiant life in the full view of everybody. In addition, another change is shown, representing the transit from life to death, then to the spirit world, with a heaven of roses as the finale. Twice every Sunday this exhibition be given, and it is well worth seeing.

## TRAINING CHARITY WORKERS.

Weekly Meetings Planned for Instruction to Paid Employees.

A training class for charity workers is announced by the Associated Charities. The meetings will be held every Tuesday in October and November, from 4:30 to 5:45 p. m., at 311 G street. The course is planned primarily for the training of social workers, but with the expectation of being useful also to nurses, volunteer friendly visitors, savings collectors, and members of the division conferences by which the most difficult cases of the Associated Charities are decided. At each session a lecture by an expert will occupy the first thirty minutes, followed by open discussion of appropriate cases presented by workers. Admission is to be by invitation only. The speakers and dates are as follows: Oct. 1, Secretary George S. Wilson, Board of Charities; Oct. 8, Miss Isabel L. Strong, superintendent Instructive Visiting Nurse Society; Oct. 15, William H. Holden; Oct. 22, Judge William H. De Lacy, president St. Vincent de Paul Society of Washington; Oct. 29, John W. Douglas, agent board of children's charities; Nov. 5, Superintendent L. E. Zinkhan, Washington Asylum; Nov. 12, Rev. John Van Schaick; Nov. 19, Rev. Father Joseph L. Maguire; and Nov. 26, Rev. W. L. Davies.

## Open-air Sacred Concert To-day.

The Naval Gun Factory Band will give a sacred concert to-day (Sunday) and every Sunday during the entire summer at Randle Highlands from 3 to 6 p. m. Take Capital Traction Pa. ave. cars going east, marked P and W, and get free transfers to Randle Highlands. Only a few minutes' ride east of the Capitol. A magnificent view of the city and surrounding country from Randle Highlands.

## GAS BELOW STANDARD

Inspector's Report Shows a Faulty Service.

## CANDLE POWER FALLS SHORT

Large Percentage of Meters of Both Washington and Georgetown Companies Are Also Found to Be Defective—Many Are Fast, Some Slow, and Others Fail to Register.

That the illuminating power of the gas furnished by the Washington and Georgetown Gaslight companies has during the last fiscal year frequently been below the standard required by law is shown in the annual report of E. O. Runyan, inspector of gas meters of the District. The report shows that of 2,175 meters of the company examined but 27 per cent were found to be correct.

The regulations in regard to the candle-power and purity of the illuminating gas supplied in the District state that "the illuminating power" of the gas shall be equal to twenty-two candles by the Bunsen photometer, using the Bray alt union burner No. 7, consuming five cubic feet of gas per hour, and such gas shall not contain more than twenty grains of sulphur in any form in 100 cubic feet, nor more than five grains of ammonia in any form in 100 cubic feet, and shall be free of the impurity known as hydrogen sulphide."

The regulations further direct that daily tests shall be made to see that the gas supplied comes up to these requirements.

## Four Testing Stations in City.

To carry out these regulations, four inspection or testing stations are maintained in the District of Columbia, one, the Georgetown testing station, at 1255 Wisconsin avenue, in the territory of the Georgetown Gaslight Company, and three in the territory of the Washington Gaslight Company, namely, the southeast testing station, at Fifth and D streets southeast; the northwest testing station, at 1335 Fourteenth street northwest, and the central testing station and office headquarters, at Tenth and D streets northwest.

With regard to the tests at the various stations the report says:

"During the year just passed, 523 official photometric tests were made of the illuminating gas supplied by the Washington Gaslight Company, with a mean of 22.94 candlepower, which was 94 of one candle above the legal requirement. The highest candle power was 27.63 candles at the southeast station, on March 6, 1907, and the lowest 16.94 candles at the same station, on September 15, 1906.

## Below Legal Requirements.

Three hundred and five photometric tests at the central testing station gave a mean of 22.23 candle power, with a maximum of 27.53 candles on March 3, 1907, and a minimum of 19.22 candles on November 5, 1906. On seventy-four days the tests showed the illuminating power of the gas at this station to be below the legal requirement of 22.00 candles. February and April were the months showing the greatest number of defaults.

Two hundred and fifty-one photometric tests at the southeast station gave a mean of 23.83 candles, with a maximum of 27.63 candles on March 6, 1907, and a minimum of 16.94 candles on September 15, 1906. On sixty-five days the tests showed a candle power below 22 candles. Eighty per cent of these defaults occurred while the water gas department of the southeast gas works was practically dismantled during the installation of new water gas apparatus.

Two hundred and sixty-five inspections at the northwest station gave a mean of 23.83 candles, with a maximum of 26.25 candles on December 8, 1906, and a minimum of 20.62 candles on October 8, 1906. On four days during the year the tests showed an illuminating power below 22 candles at this station. On the day of the lowest power was below 22 candles at all three stations, and on twenty-nine days the average candle power for the three stations was below 22 candles. These low results were nearly all obtained during the time new apparatus was being installed at the gas works.

## Georgetown Company's Defaults.

Three hundred and three official photometric tests were made of the gas supplied by this Georgetown Gaslight Company, yielding an average of 22.84 candles. The highest result was 27.50 candles on October 24, 1906, and the lowest, 18.18 candles, on December 12, 1906. On thirty-nine days the tests showed the illuminating power of the gas to be less than 22 candles.

During the year the office inspected and proved 6,825 meters, of which number 6,559 were in the territory of the Washington Gaslight Company and the Washington consumers. Of the 1,657 meters inspected for the consumers, according to the report, 419, or 25.29 per cent, were fast, an average error of 4.27 per cent; 79, or 4.79 per cent, were slow, an average error of 4.35 per cent; 507, or 30.64 per cent, were correct, and one failed to register. The 1,118 company complaint meters showed 19, or 1.70 per cent, to be fast; average error, 5.74 per cent; 457, or 40.98 per cent, were slow; average error, 26.47 per cent; 22, or 1.97 per cent, were correct, and 447, or 39.98 per cent, failed to register the gas passing through them.

## Meters Not Correct.

Forty-three meters were inspected on complaint of consumers in Georgetown. Of this number, 11, or 25.58 per cent, were fast; average error, 4.37 per cent; 2, or 4.65 per cent, were slow; average error, 4.35 per cent, and 30, or 69.77 per cent, were found to be correct. Ten meters were inspected on complaint of the Georgetown Gaslight Company. One proved to be 6 per cent slow, one 2 per cent fast, and eight were correct.

In his estimates for the next fiscal year, Mr. Runyan asks that his salary be increased from \$2,600 to \$2,800 a year, and recommends the following increase in the salaries of his subordinates: B. J. Waters, assistant inspector of gas meters, from \$1,000 to \$1,100, and T. A. Ritchie, assistant inspector, from \$840 to \$1,000.
